Key Economic Indicators

Population & Human Resources (1379)

Population	63.9 million
Urban	40.8 million
Rural	23.1 million
Population Growth	1.7 percent
Population Density	39 per Sq Km
Active Population	18.6 million
Employed population	15.6 million
Literacy Ratio (1378)	
6 years and over	83.0 percent
6-29 years	96.3 percent

Real Sector (1379)

GDP Growth (1369=100)	5.9 percent
Non- oil GDP Growth	5.6 percent
GDP Growth (3 rd FYDP)	
Average period	6.0 percent
1379	4.5 percent
GDP (current prices)	Rls. 579,275 billion
Gross Fixed Capital Formation (current prices)	Rls. 157,556 billion
Private Consumption Expenditures	Rls. 263,936 billion
Public Consumption Expenditures	Rls. 83,795 billion
Per Capita Income (current prices)	7,204 thousand rials
Inflation Rate (average period)	
3 rd FYDP (target)	11.4 percent
1379 (target)	19.9 percent
1379 (performance)	12.6 percent
First quarter 1380	11.4 percent

Govt. Fiscal Sector (Q1, 1380)

Revenues	Rls. 28,034 billion
Expenditures	Rls. 26,209 billion
Expenditures/GDP (1379)	18.7 percent
Budget Deficit/GDP (1379)	0.3 percent

External Sector (Q1, 1380)

Current Account Balance	US\$ 2,248 million
Trade Balance	US\$ 2,315 million
Exports	US\$ 6,645 million
Imports (FOB)	US\$ 4,330 million
Total Foreign Debts (end of the period)	US\$ 7,393 million
Exchange Rate (IRR/US\$)	Q1, Average
Oil – Notional	1,752.50
Certificate of Deposit	7,917.99

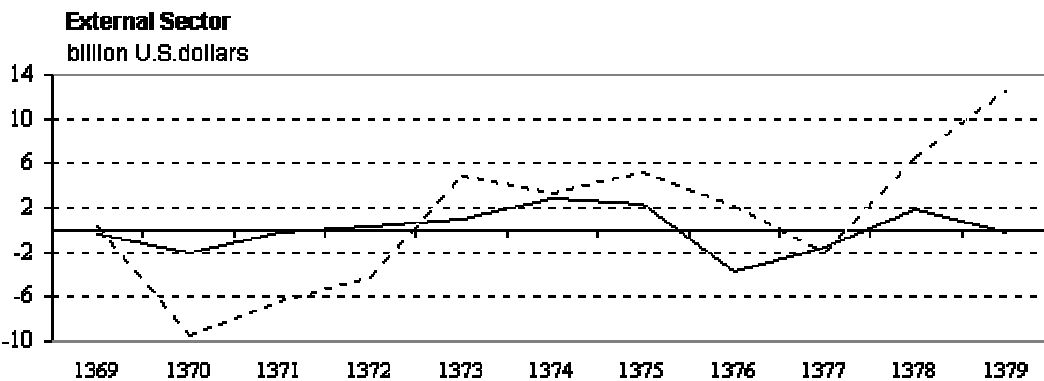

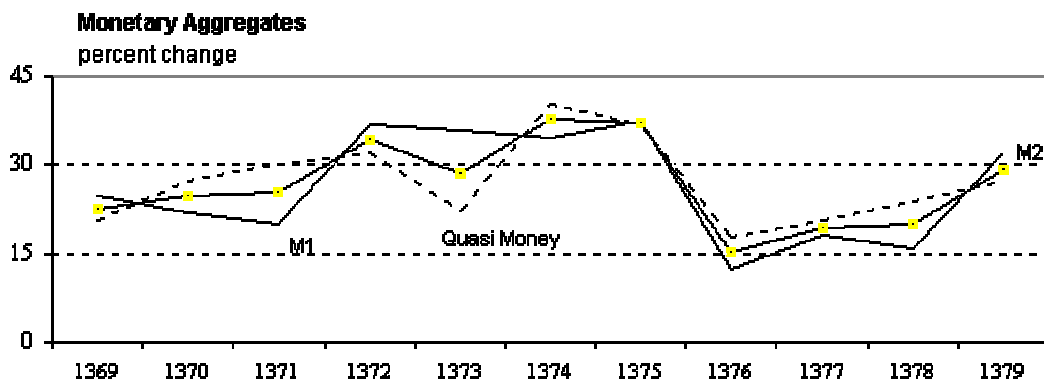

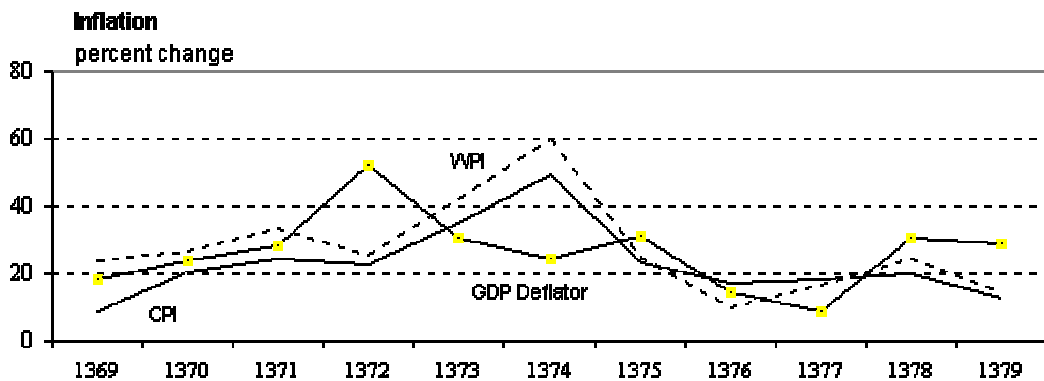

Monetary Sector (Q1,1380)

Liquidity Growth (M ₂)	5.5 percent
Money Growth (M ₁)	0.4 percent
Quasi-Money Growth (QM)	9.8 percent
Growth of Non-public Sector Deposits	8.3 percent

Tehran Stock Exchange (Q1,1380)

Share Price Index (end of the period)	3,387.72 Units
Value of Transactions	Rls. 1,444.9 billion
Number of Transacted Shares	369.1 million

Major Economic Trends

- (1) Discrepancy between the sum of current and development expenditures and the total is due to the payment of provincial revolving fund for which breakdown into current and development is not available.
- (2) On the basis of new classification "receipts from foreign loans" has been also deducted from other revenues and classified under sources of deficit finance.
- (3) Figure for foreign exchange sale includes transfers from paragraph B of Note 29 of 1379 budget by Rls. 1,823.8 billion.

APPENDIX I

Key Features of Trade and Exchange System

The currency of the Islamic Republic of Iran is the Iranian Rial, and the exchange system is based on a dual exchange rate structure:

a: The "oil-notional" rate is fixed at Rls. 1,750 per US\$, which applies to part of oil and gas export receipts, which is allocated to imports of essential goods and services, debt services, and imports related to large national projects.

b: The "non-oil export" rate, which is applied to non-oil exports receipts and imports of goods and services and other transactions which are not carried out at oil-notional rate. All non-oil exporters are granted the right to deposit their foreign exchange proceeds with banks and receive certificate of deposits (CD). The CDs could be traded on the Tehran Stock Exchange (TSE), sold directly to agent banks within three months of the issuance of CDs or used for opening LCs for import purposes. The non-oil export rate is the rate of certificate of deposit being traded on the TSE. It should be noted that since the beginning of the 3rd FYDP (2000/01-2004/05), the export rate at Rls. 3,000 per US\$ was eliminated.

The authority for foreign exchange policy and regulation is vested with Bank Markazi Jomhuri Islami Iran. All foreign exchange transactions must take place through the banking system.

Imports and exports are governed by regulations issued periodically by the Ministry of Commerce after approval by the Cabinet. According to these regulations, import goods are divided into "authorized", "conditional" and "prohibited" goods. "Authorized" goods require no special license or permits for importation, while importation of "conditional" goods requires licensing by respective authorities. "Prohibited" goods are those, which are forbidden by Islamic Sharia, or respective laws. But it should be noted that in view of elimination of certification procedures for almost all import items, the number of goods under conditional categories reduced to a minimum.

All imports are subject to import advance payments. The minimum import advance payments is 10 percent. Most imports are subject to duties including commercial benefit tax. The commercial benefit tax rates are specified in the Export-Import Regulations by the authorities each year.

Persons needing medical treatment abroad may obtain foreign exchange at the CD rate upto the amount specified by the High Council of Health. In case the allocated amount does not fully cover the expenses, the balance could be allocated at negotiated rate. Foreign exchange allowances are provided for students holding fellowships at oil-notional rate by the relevant authorities granting fellowships. For other students studying abroad foreign exchange will be allocated at CD rate.

Iranian nationals travelling abroad may purchase upto 2,000 US dollars at negotiated rate for three travels in each year. Every accompanying person (over 12 years) in-group passports, is eligible to purchase upto maximum of US\$1000 per person, at the negotiated rate, for maximum of four persons.

Iranian nationals and foreigners are allowed to hold interest bearing foreign exchange deposits with authorized domestic banks. Two types of foreign exchange deposits are permitted, i.e. foreign exchange deposits of "external origin", and foreign exchange deposits of "domestic origin". Foreign exchange with external origin could be traded at negotiated rate. Balances of the foreign exchange deposits of "external origin" may be taken out of the country freely. Maximum interest rate payable on foreign exchange time deposits is LIBOR plus one percentage point.

There is no limit on the amount of foreign exchange that travelers may bring into the country. However, for the purpose of repatriation, the amount must be declared at the time of entry. Iranian travelers leaving the country must pay an exit fee of Rls. 70,000.

Foreign investment in Iran is allowed. The right for repatriation of principal and dividends is guaranteed if the investment is made under the 1955 Law for the Attraction and Protection of Foreign Investment. As for portfolio investment, non-residents may invest in instruments traded on the Tehran Stock Exchange.

APPENDIX II

Summary of the Monetary and Foreign Exchange Policies During 2001/02

A. Monetary and Credit Policies

The banking system constitutes the core of the financial sector in Iran and plays a critical role in transmitting monetary policy impulses to the entire economic system. Each year after the approval of government's annual budget by the Islamic Consultative Assembly, the Central Bank presents a detailed monetary and credit policy to the Money and Credit Council for approval. Thereafter, certain core elements of monetary and credit policy need to be approved by the Cabinet. This procedure is followed in accordance with Article 19 of Usury-Free Banking Act of 1983 which stipulates that short-term credit policies need to be approved by government and long-term credit policies have to be incorporated within the Five Year Development Plan documents and approved by the Parliament.

The approved money and credit policies for 1380 fiscal year (2001/02) stipulates that:

1. In accordance with paragraph B, Note 3 of the 2001/02 Budget Law, the Central Bank is authorized to determine the total credits and facilities of banking system for this year, and the ratio of long-term credits and facilities to the short-term, and regulate credit plans and facilities of the banking system on the basis of the amount of current and

investment deposits after observance of banks legal obligations, and implement these policies in such a way that the targets of economic growth and inflation as envisaged in the 3rd FYDP be realized.

- On the basis of the Money and Credit Council (MCC) approval, the provisional rate of profit on term investment deposits and rate of profit on banking facilities extended by the banks to different economic sectors were determined as follows:

Expected Rate of Profit on Banking Facilities	
Economic sector	% per annum
Agriculture	14-15
Manufacturing and Mining	16-18
Housing:	
Within housing pattern	17
Out of housing pattern	19
Housing savings fund:	
Within housing pattern	15
Out of housing pattern	16
Export	18
Trade and services	23 (minimum)

The above rates are mandatory as of May 12, 2001 and provisional rate of return on deposits and facilities whose contracts were signed before the above date, would follow the applied rates upto maturity of the contracts. The above rates are not applied to non-bank credit institutions and private banks.

- During 1380, except for 25 percent of the increase in banking facilities, which would be free from sectoral allocations, banks are obliged to observe the sectoral shares of the increase in the balance of facilities to non-public sector. Therefore, the shares will apply only to 75 percent of the increase in facilities. The sectors' share of facilities extended by banks are shown in the respective table:

Provisional Rate of Term-investment Deposits	
Investment Deposits	% per annum
Short-term	7
One-year	13
Five-year	17

Furthermore, in order to promote competitive position of banks, they are allowed to determine the provisional rate on 2, 3, and 4 year term investment deposits directly, within the range of 13 to 17 percent. Thereby, the Central Bank and the banks' depositors must be informed about the rates and their effective dates by the banks.

Share of Economic Sectors in Banking Facilities Extended to the Non- Public Sector	
Economic sectors	Share (percent)
Agriculture	25.0
Manufacturing and Mining	33.5
Housing	20.0
Construction	9.0
Exports	8.0
Domestic trade and services	4.5
Total	100.0

- The reserve requirement ratios by type of deposits approved by the MCC are as follows:

Reserve Requirement Ratios		(percent)
Type of Deposit	Commercial Banks	Specialized Banks
Sight deposits	20	10
Savings Gharz-al-hasaneh deposits	20	10
Housing savings deposits		2
Short-term investment deposit (includes 6-month special deposits)	20	10
Term-investment deposits		
One-year	20	10
Two- year	10	10
Three-year	10	10
Four-year	10	10
Five-year	10	10

As a result of reduction in average reserve requirement ratio, the released excess reserves of the banks will be used to fulfill the requirements of specialized banks in the form of inter-bank facilities and excess of that will be utilized in long-term investment projects.

5. According to paragraph C, Note 3 of the 2001/02 Budget Law, the increase in outstanding of scheduled facilities of the banks in this year is authorized upto the ceiling of Rls. 4,800 billion. Out of this amount, the share of public sector is 30 percent, and share of cooperative and private sectors is 70 percent. At least 60 percent of cooperative and private sectors' share of scheduled facilities has to be utilized with the aim of employment generation in the underdeveloped areas.
6. According to the Note 2, Article 4 of the budget law relating to the issuance of the participation papers, the MCC determined the ceiling for issuance of participation papers by the non-public sector at Rls. 5 thousand billion.
7. Based on Article 91 of the 3rd FYDP law and in order to mop up the excess liquidity, the MCC authorized the Central Bank to issue participation papers according to monetary targets set in the Plan. The ceiling set by the MCC is Rls. 8,000 billion, out of which Rls.2,915 billion with maturity of 6 months and 19 percent provisional profit rate were sold upto the end of the first quarter of 1380.
8. The provisional profit rate of the government participation papers (after deduction of tax) is determined at 17 percent per annum, and other conditions for issuance of participation papers will remain unchanged as before.
9. The issuance of establishment permits for two private banks (Parsian, Eghtesade Novin) in the first quarter of 2001/02 is considered as the first step in privatization of banking operations.

B. Foreign Exchange Policies and Regulations

The exchange market and exchange rate policies in 2000/01 and the first quarter of 2001/02 were aimed at maintaining a relatively stable nominal exchange rate, with liberalization of exchange regulations. One major development in the foreign exchange system of Iran in recent years was the elimination of export rate (Rls. 3,000 per US\$) and the establishment of a fully functioning market for foreign exchange transactions in Tehran Stock Exchange. As of the beginning of this new system (March 2000/01), the exchange system is principally based on two exchange rates; an oil-notional rate which is solely applied to government budget, approved specific transactions, and a non-oil export rate which is used for other foreign exchange transactions. As of the beginning of 1379 and the first quarter of 1380 the following policies have been implemented:

1. Non-oil exporters are entitled to receive certificate of deposits (CDs) after the surrender of foreign exchange to their agent bank. Hence, the foreign exchange certificate of deposit was substituted for import certificate. These CDs can be used to open letter of credit for import purposes, to be sold either through TSE to other importers, or directly to agent banks within three months of the issuance of CDs.
2. The manufacturing units are allowed to import raw materials, spare parts and other required equipment against export of their own products, and settle their foreign exchange obligations through this mechanism.
3. The minimum deposit requirement for the opening letters of credit for imports by non-public sector was reduced to 10 percent.
4. Following the phased expansion of the "positive import list" from authorized imports with non-oil export receipts, the "positive list" was effectively replaced by a "negative list" at the end of 1379 and beginning of 1380. In line with the targets set in the 3rd FYDP, all non-tariff barriers, quotas and certification procedures (except for obligatory standard reasons) by line ministries and specialized government agencies for imports of raw materials and industrial products (except for car and transportation vehicles), were eliminated and replaced by commercial benefit taxes.
5. The exporters who export and settle their accounts through banking system are exempted from pledging collaterals or advance payments. The export ceilings on uncollateralized non-oil exports with regard to surrender requirements will not be applied to exporters who settle their accounts through banking system, exporters with more than five years of experience and with good reputation and approval of Export Promotion Center, and the

exporters of technical and engineering services. Moreover, exports of all non-oil goods and services were exempted from all taxes and customs duties in line with the guidelines of the 3rd FYDP.

6. In line with policies of the 3rd FYDP, upto fifty percent of accumulated deposits in government Oil Stabilization Fund could be lent to non public sector. However, banks should collect sufficient guarantees to ensure that repayments of the facilities will be made in foreign exchange. As of the beginning of 1380, banks were allowed to extend foreign exchange facilities from OSF resources to non public sector. The individual ceiling for real persons was set at five million US dollars.
7. The regulations on LCs at CD rate were facilitated and simplified. Banks were authorized to extend the maturity of opened LCs at CD rate and endorse import documents with minor discrepancies.
8. The ceilings and foreign exchange quotas of universities and research centers for registration and subscription fees and other payments to international conferences and seminars were eliminated. Moreover, sale and transfer of foreign exchange by banks to local corporations and organizations, government agencies, real and legal persons for international conferences and organizations, were allowed at negotiated rates.

APPENDIX III

Third Five Year Development Plan 1379-83 (2000/01-2004/05)

The Third Five Year Development Plan is formulated with a view to various aspects of the existing realities of the country, the challenges that the economy faces and the emphasis on having a comprehensive and balanced plan.

The 3rd FYDP is a package of articles, policies, and guidelines covering 26 sectoral and intrasectoral areas and provide a comprehensive framework for resolving structural impediments and economic difficulties during the Plan period.

The core elements of the general policy framework of the Plan are as follows:

1. The "High Council of Administrative" will be established in order to reform administrative system and human resource management.
2. The financial position of all public enterprises will be assessed with the aim of either liquidating, privatizing merging or restructuring them.
3. "State Tax Affairs Organization" will be established as a public institution under the supervision of the Minister of Economic Affairs and Finance with the objective of raising the efficiency of the tax system and eliminating the existing organizational bottlenecks.
4. "Oil Stabilization Fund" will be created for reducing budget reliance on oil revenue and ensuring the sustainability and preservation of national wealth.
5. The net increase in scheduled banking facilities will be reduced by 10 percent on an annual basis, taking 1378 approved figure as the benchmark. Government's support for economic activities in the form of preferential lending rates and loan repayment guarantees will become transparent and taken care of within the government's annual budgets.
6. The amount of official external obligations will be regulated, so that net present value of these obligations will not exceed US\$25 billion and debt service ratio (excluding buy-back agreements) will not exceed 30 percent of government foreign exchange receipts at the final year of the Plan period.
7. Government will issue upto Rls. 5,000 billion specific participation papers for recapitalization of the banks. The proceeds from the sale of these papers will be used for strengthening financial position and government capital investment of the undercapitalized banks.
8. The Central Bank will prepare the condition for the operation of private banks and private non-bank credit institutions.
9. The government is authorized to extend facilities to investors who participate in job creating plans and small scale industries in proportion to their financial contributions in projects.
10. In order to achieve the export targets during the 3rd FYDP:
 - One. The customs duties and tariff of imported raw material and intermediate goods used in production of exportable goods, will be refunded after the export of goods.
 - Two. The exported goods and services are exempted from any tax or levy.
 - Three. The export of goods and services is exempted from any permits except the mandatory standards and the certificates commonly applicable in international trade.
 - Four. In order to promote the export of non-oil commodities and technical and engineering services, a portion of surplus revenue received from oil exports will be allocated to increase the working capital of Export Development Bank.
11. The government is required to remove the non-tariff barriers, in order to promote foreign trade.
12. In order to design export strategies and determine the facilities to be extended to export sector, the High Council of Non-oil Export Promotion will be established under the chairmanship of the President.

**Quantitative Targets in 3rd FYDP
1379-83 (2000/01-2004/05)**

(percent)

	1379	1380	1381	1382	1383	Annual Average
