Correspondence between Iranian Solar Hijri and Gregorian Calendars [1]

1403 Iranian Solar Hijri Calendar				2024/25 Gregorian Calendar	
	Month	Day		Month	Day
Spring (Q1) 31 days	Farvardin	1 31	2024	March April	20 19
	Ordibehesht	1 31		April May	20 20
	Khordad	1 31		May June	21 20
Summer (Q2) 31 days	Tir	1 31		June July	21 21
	Mordad	1 31		July August	22 21
	Shahrivar	1 31		August September	22 21
Fall (Q3) 30 days	Mehr	1 30		September October	22 21
	Aban	1 30		October November	22 20
	Azar	1 30		November December	21 20
Winter (Q4) 30 days	Dey	1 to 11		December	21 to 31
		12 to 30	2025	January	1 to 19
	Bahman	1 30		January February	20 18
	Esfand	1 30		February March	19 20

In this table, the Iranian Solar Hijri and Gregorian calendars are shown side by side. For example, **1 Farvardin 1403** corresponds to **20 March 2024**, and **31 Farvardin 1403**—the final day of the 31-day month—falls on **19 April 2024**. As shown in the table, **Dey** is the month during which the Gregorian year changes. For example, **1–11 Dey 1403** correspond to **21–31 December 2024**, whereas **12–30 Dey 1403** correspond to **1–19 January 2025**.
